

CSS Navigation Bars

Having an easy-to-use navigation is important for any website!

CSS navigation bars are an important component of web design. Navigation bars helps users to easily navigate between different sections of a website.

Navigation bars are typically built with HTML list elements (`<ul>` and `<li>`), and then styled with CSS to get a great look.

Navigation bars are typically located at the top or at the side of a webpage.

Navigation Bar = List of Links

A navigation bar needs standard HTML as a base.

A navigation bar is basically a list of links, so using the `<ul>` and `<li>` elements makes perfect sense:

CSS Vertical Navigation Bar

In a vertical navigation bar, the navigation links are stacked vertically (on top of each other), and is typically aligned along the left or right side of a webpage.

The basics of a vertical navigation bar is an unordered list (`<ul>`), with list items (`<li>`), each holding a link (`<a>`), as shown in the [Navbar Intro](#) page.

CSS Horizontal Navigation Bar

In a horizontal navigation bar, the navigation links are stacked horizontally (next to each other), and is typically aligned on the top of a webpage.

The basics of a horizontal navigation bar is an unordered list (`<ul>`), with list items (`<li>`), each holding a link (`<a>`), as shown in the [Navbar Intro](#) page.

It is also common to add a `<nav>` element around the `<ul>` element, that will serve as a container for your navigation bar.

Design:

Index.html

```
<!DOCTYPE html>
<html lang="en">
<head>
  <meta charset="UTF-8">
  <meta name="viewport" content="width=device-width, initial-scale=1.0">
  <title>Document</title>
  <link rel="stylesheet" href="style.css">
</head>
<body>
  <ul>
    <li><a class="active" href="#home">Home</a></li>
    <li><a href="#news">News</a></li>
    <li><a href="#contact">Contact</a></li>
    <li><a href="#about">About</a></li>
  </ul>
</body>
</html>
```

style.css

```
body {
  margin: 0;
  padding: 10px;
}
ul {
  margin: 0;
  padding: 0;
  display: flex;
  background-color: ghostwhite;
  list-style-type: none;
}
ul li a {
  display: block;
  padding: 20px 50px;
  text-decoration: none;
}
ul li a:hover{
  background-color: lightgreen;
}
ul li a.active {
  background-color: green;
}
```
